

REFLECTION : SPACE

I'm a cosmic goober. I love space, and all things beyond.

When this framing of space was landing for me, it significantly shifted how I relate to space and my relationship with it. I wish the same for you, so let's goooo!

- What do you feel in your body as you read, “the feminine is space”?
- How do you try to hold, manage, or make space?
- What is your current relationship with space, not as an idea or concept, but with the energy itself?
- Space is also the higher frequency of air. What happens in you as you consider this? Does the idea expand you?
